Jurnal Komunikasi: Malaysian Journal of Communication (SCOPUS Indexed); Jurnal Komunikasi Universitas Islam Indonesia (accredited by Ristekdikti); Asian Journal of Media and Communication (AJMC)

Call For Paper

Hundreds of years after leaving the 'nomad' stage, humans still encounter problems in living and relating with the earth. A lot of contemporary events illustrate human-environmental problems, eg. spatial-political conflict, migration, and natural disasters. Meanwhile, old issues such as globalization and global warming still leave many social problems. Communication is an important element in the dialectic of space and human environment problems. Thus, communication should be able to make the earth as a comfortable place to live.

Topics

Environmental communication
